

# Discovery Kit 8

## Contents

1 x Blue tablet with tripod  
1 x Green tablet with tripod  
Both with velcro strap attached

1 x Blue microphone and lanyard

1 x Green microphone and holder

1 x USB charging hub and charging cables

2 x Cases with spare parts for tripod

Optional:  
1 x Coaching ear piece  
Used only with the Go Live feature

Serial Number

## Set-up and Recording Instructions

### Step 1: Setting up the tripods

1. Rotate the legs out and down, away from the central pole, to create the desired footprint. Ensure the leg is locked into one of the clip settings at the top of the leg (see the **adjusting the legs** section below) and make sure all legs are on the same setting so the tripod is sitting level
2. The wider the legs are extended the greater stability the tripod will have
3. Open the clips on the central pole to extend it to the desired height then close the clips to lock it in place at that height

#### Adjusting the legs / Putting the tripods away

The clips at the top of the legs allow you to adjust the angle of the legs. Press/pull the clip down to set it to the desired footprint setting or to fold the legs back up against the central pole when putting the tripod away

### Step 2: Connecting to the microphone

1. Make sure Bluetooth is turned on on the device
2. Press and hold the microphone button for 3 seconds to turn the microphone on
3. The microphone will automatically connect and show a blue flash every 5 seconds
4. The device will now show IRIS Connect Microphone as 'Connected' on the Bluetooth menu

Note: If the microphone doesn't pair, you may need to follow the **Pairing the microphone** guide on the right

### Step 3: Placement of tripods and microphones

1. Place the tripod(s) either on the floor or on a desk or shelf, extending or decreasing the central pole to the desired height
2. Position the tripod in a safe place where it is unlikely to get knocked.  
**We recommend using the velcro strap** attached to the tripod to secure it to a table leg or similar (pictured). This is particularly important if using the tripod on the narrowest footprint setting, or at the full height extension
3. Clip the blue microphone to your clothing or use the lanyard provided
4. Place the green microphone where you wish to capture the audio

#### Single Tablet Use

If you are only using one tablet make sure you use the same colour microphone to ensure the tablet and microphone are paired. (Blue tablet if wearing the blue microphone and green tablet if using the green microphone in holder)

### Step 4: Record app

1. Launch the IRIS Connect Record app on the devices and follow the on-screen instructions
2. Select either front or back camera and make sure you are capturing the view you want to record on the devices

### Step 5: After recording

1. Make sure your reflection has completed uploading before closing the app
2. Power off then charge the microphones and devices before returning them to the case. To turn off the microphone, press the button for 3 seconds until you see a purple light, then release

## Bluetooth Microphone Guide

### Pairing the microphone

1. When pairing for the first time make sure the distance between the device and microphone is less than one metre
2. Turn on the microphone by pressing and holding the button for 3 seconds until the indicator light shows a purple light, then release
3. Navigate to your device's Bluetooth settings menu
4. Turn on Bluetooth and select **IRIS Connect Microphone** from the list of available Bluetooth devices
5. The device will now show the status as 'Connected' on the Bluetooth menu

### Indicator light guide

- Blue flashing - pairing mode / not connected
- Blue flash every 5 seconds - connected
- Solid purple - powering on/off
- Solid red - low battery

### Charging

- Solid red - charging
- Solid green - fully charged
