Welcome to your Record Kit DualView!

To setup and start using your kit please follow these steps:

---

1. Kit Type

a. Check the accompanying dispatch note (or your order details) to confirm if your kit is a **Record Kit DualView** or **DualView Pro**, and either **BYOD,** or **Devices Included** (**Android** or **iOS versions**).

b. If devices have not been ordered with it, dedicated devices will need to be sourced for the kit. Or the kit can be used as a **BYOD** (bring your own devices) kit, where each user provides their own recording devices.

The kit type will inform what stickers you use for step 3. The stickers advise the user what to expect in the kit and if they need to provide their own device.

---

2. Package Contents

DualView   *1 x Record Kit, 1 x Floor Tripod*
DualView Pro *1 x Record Kit, 1 x Floor Tripod, 2 x additional Bluetooth Mics*
Android and **iOS** versions will also have:
             2 x Phones or Tablets and 2 x Device Covers

*If the **GoLive** feature has also been ordered, you will have been sent a **GoLive Earpiece** too.*

---

3. Stickers

Once you know the *kit type* (see Step 1), stick the relevant *Kit Type* sticker onto the space on the Instruction Card (in the lid of the kit) using the stickers pack (also in the lid of the case).

If you have a Pro kit, stick a mic serial number sticker onto the additional microphones, one blue, one green.

---

4. Devices **BYOD version kits skip this section**

a. Unbox the device and plug the included device cable into the charger in the kit.
b. On the back of the devices stick a small blue serial number stickers from the stickers pack on one device, and a green serial number sticker on the other.
c. Then put the device covers on the devices.

5. Mic Pairing

Pair the mics to the devices as follows, *(see instruction card reverse for more detailed instructions)*. Pair the blue mic to the blue device, and green mic to green device:

    a. Press and hold the button on the mic to turn it on. It should be rapidly flashing blue.
    b. On the device, use the Bluetooth menu/settings to pair to *IRIS Connect Bluetooth Mic*.
    c. If successful the mic will now flash blue intermittently and the device should say *Connected*.

*Note - Step **5** will need completing every time new/different devices are used with the kit.*

---

6. Set up the Record App

If not installed then install and test the Record app on all devices.

Record App

Search:"IRIS Connect Record" on the Play Store or App Store

---

7. Get in touch!

Contact our Support team *(details below)* so they can sign off your install and answer any questions you may have.

Additional Information

Pro Version Kits
You can pair two mics to one device to capture additional mic audio. (2 blue mics paired to the blue device and 2 to the green). Follow the labelling and pairing processes above for the additional mics.

Stickers and Labelling
- **Serial Number stickers**: Labelling the items in the kit with the kits serial number helps prevent items being mixed up between kits and maintain Bluetooth pairing.
- **Green and Blue Stickers**: The green and blue colour coding is to make it clear in kits with multiple devices which mics are paired to which devices.
Storing the Devices in the kit
There are sections in the lid for devices to be stored in; the smaller front pockets for phones and the larger pocket behind for tablets/iPads. Device charging cables can be plugged into the charging plug/hub.

Storing/Carrying the Floor Tripod
If your kit comes with a floor tripod, this can either be carried separately or you can use the bungy cords (attached to the bottom of the case) to attach it to the case.
