

Contents

1x Primary iPad & tripod

1x Primary iPod & lapel microphone

1x Secondary iPad & tripod

1x Secondary iPod & microphone
Available only with Discovery Kit Pro

1x Belt

1x Wide angle lens

2x 3 meter iPad charging cables & plugs

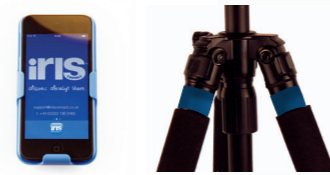

1x USB charging hub & charging cables

Step 1

Turn on all devices.

Press and hold this button

If you are only using one iPad to record, make sure you use the corresponding paired iPod.

The paired devices can be identified by the matching coloured iPod case and tripod band.

Step 2

Decide how you are going to wear the primary microphone - either clip to the belt or place in your pocket.

Step 3

Clip on the lapel microphone.

Make sure it's not obstructed by any jewellery, lanyards, hair or clothing.

Step 4

Launch the IRIS Connect app on all devices.

Step 5

Position the iPads to capture the part of the room that you want to record.

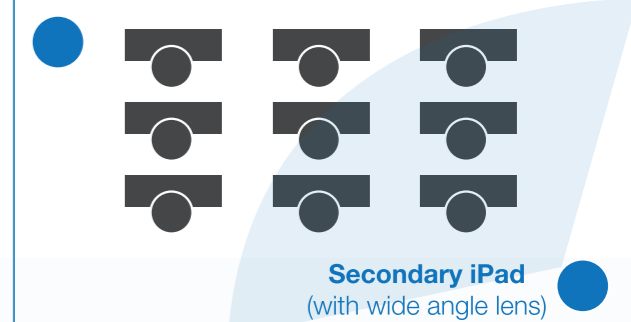

Use the **wide angle lens** to capture a wider view of the room.

If the battery levels are low, position the iPads near a power socket so you can charge them whilst recording.

Face the iPads away from windows to reduce any glare from the sunlight.

Example positioning of devices

Primary iPad

Secondary iPad (with wide angle lens)

Wide angle lens

Step 6

(Only applicable if you have Discovery Kit Pro)

Position the secondary microphone.

Place near a group to capture their conversations and responses.

Step 7

Follow on-screen instructions to start recording.

If you have any questions just **contact our support team.**

For more information on how to set up and use your IRIS Connect system please visit the **User Training Group** on the platform.
